TECHNOLOGIES

Mobile DMS

Centegy's Mobile DMS is an "all-in" single android-based solution that helps to expand market reach, streamline sales operations, reduce costs, and enhance customer service, offering real-time visibility of market insights from remote and complex geographies.

- Android-based application designed to capture sales in complex geographies

- Reduces operational costs and improves market demand capture

- Hybrid Capability – Works online and offline in low coverage areas

- Expanding market reach and enhanced customer service

- Streamlines order processing, inventory management, and sales KPIs tracking

- Provides visibility of small distributors, sub-distributors, and wholesalers

- Powered by native integration with Centegy's DMS platform & flexible third-party integration

- Geo-compliance, GPS-enabled e-customer registration

- Enhancing Visibility and On-Shelf Availability of Products

- Comprehensive customer credit management, collections, digital invoicing, legal-fiscal compliance
